One of the major ambitions of our corporation is the improvement, production and the disposal of our products for the consumers. For this reason a sector of quality control was created, since 2001, that consists of a personnel with scientific knowledge, in order to perform the checks that are necessary in terms of the iso certification: 22000 from the TUV AUSTRIA HELLAS, which is an proprietor. Also, it cooperates with associates such as chemists, certified labs, scientific associates, educational commissions and so forth, as to ensure the enactment and analysis of all the parameters that are needed in order to produce safe and extra fine products.

The basic principles consist of:

- The **search** for supreme raw materials
- Their **quality check** with contemporary methods and high standards
- Their **processing** with high-end methods and machines with basic aim the best industrial practice
- The constant **update** and education of our staff so it can cope with modern needs
- The **evaluation** of our suppliers based on the aim of quality's assurance
- The **examination of safe** and practical materials for packaging
- The **strategic of strengthening** the bond between farmers-producers, through progressive communication and search of the best methods of production
- The **attempt to ensure** the production of traditional products, with high security and specificity
- The **attempt to expand** the greek production with greek labor, greek raw material, greek machinery wherever that may be possible, of course. Aim of the corporation is to produce products of high quality in Greece that may find a place in the marketplace abroad
